# PRODUCTION PROCES

## OWN MANUFACTURING PLANT IN BOSNIA

All furniture and wooden home accessories from Pilat&Pilat are produced at Nordent. They have their own manufacturing plant in Bosnia Herzegovina, employing some 60 craftspeople on a full-time basis. Pilat&Pilat like to buy their wood privately from small-scale operators. For many generations, orchards have been a sustainable source of income for the elderly in the woody regions of Bosnia. On average, families have about two hectares of woodland with dozens of fruit trees, such as walnut and cherry trees. After many years of harvesting the fruits, the trees are finally given the chop. Three trees will get a family, often consisting of three generations, comfortably through winter. The younger generation always takes care of new plantings and the maintenance of the orchard. A personal hallmark of care and dedication is automatically passed on to the growing wood from one generation to the next.

FROM FAMILY ORCHARD TO 'FAMILYJE' COLLECTION. A SUSTAINABLE AND SENSIBLE PROCESS.

## SUSTAINABLE WOOD SELECTION

The solid wooden furniture of the 'Familyje' Collection revolves around three types of wood: oak, light elm and walnut. The unique character of the tree is retained in each piece of furniture. In terms of appearance, no two pieces of the same type of furniture are exactly identical, because of a different shade, for instance.

For the Familyje Collection, a furniture maker will endeavour to create the best possible balance by choosing the right wood. A customer with special requirements with regard to the preferred furniture wood is advised to first talk to his dealer. In many cases, it would be desirable to match the appearance of new furniture to the customer's preference. Colour and structure are variables for the customer to choose from. The furniture maker will do his best to meet the customer's choice. However, this may result in an extra charge. As was pointed out, the procedure of purchasing wood in Bosnia is quite different from the methods followed by Dutch furniture manufacturers, who buy their wood from wholesalers. We buy a certain quality of wood as required, at a price to match. Pilat&Pilat and Nordent take responsibility for the environment by using the large pieces of high-quality wood for making furniture. Smaller pieces, left over after selecting and manufacturing furniture, are used for the production of home accessories. Any remaining wood is used for heating the dry kilns and the furniture plant. In this process, native trees from wooded Bosnia are being used in a sustainable manner.

## TAILORED TO SUIT INDIVIDUAL REQUIREMENTS

The furniture quality is continuously monitored during the entire production process. Each piece of furniture is custom-made of the type of wood chosen by the customer. Please contact us for a price of nonstandard items. In addition to deviating sizes, alternative tabletop patterns and details such as a bevel or a rounding of the table top are possible.

# FINISH OPPORTUNITIES OF SOLID WOOD

## THREE WOOD TYPES CENTRAL

The solid wooden furniture of the Pilat&Pilat Famylje Collection revolves around three types of wood; oak, walnut and light elm. The unique character of the tree is retained in each piece of furniture. That is the reason why no two pieces of furniture are exactly identical, but will differ in things like colour shade. The wood is selected and processed by experienced furniture makers in our own factory in Bosnia. Our furniture quality is continuously monitored during the entire production process. Each piece of furniture is custom-made of the type of wood chosen by the customer. The wood is finished using natural oil, furniture soap or a laquer.

## BEECH WOOD

From January 2023 we now also offer the wood type beech for a selected number of collection models. Beech wood has an even structure with little drawing and wide plank parts are possible. This gives a beech wood piece of furniture a calm, light appearance.

## WOODEN SAMPLE BOX

The solid wooden furniture have several possible finishes. Depending on the appearance and maintenance, a finish that suits the user can be chosen. The furniture can be finished with natural oil and / or soap, which gives the wood a soft, natural look. Furthermore, a lacquer, possibly in combination with a stain or paint finish can be chosen. The sample material provides insight into the options available.

## MATERIAL SAMPLES AND FINISHES

An overview of the wood samples and finishes can be found on our website [www.pilat.nl](http://www.pilat.nl). At the bottom of the footer, click on 'Wood samples and finishes' for an overview of the wood samples with the various finishes and the basic colors that we use for coated steel. This also applies to the standard colors of sheep leather and cow leather that we offer.

# PROPERTIES OF SOLID WOOD

## WOOD IS A PRODUCT OF NATURE

Due to the natural nature, the color and structure of the furniture are never identical. In spite of the treatment, the colour of the wood may change over time due to influences of sunlight and artificial light. Wood has an open structure. As a result, exposure to humidity in the air may have an effect on the furniture. Changes may occur at any time. Particularly during winter months when heaters are turned on full power, the air may become too dry for the wood.

To minimise the risk of warping of the wood, we suggest a healthy indoor climate with a room temperature of approx. 20 degrees Celsius and a relative air humidity of around 50% - 60%. Dry air may cause minute cracks in the wood, which will close again as the humidity level goes up. A natural product such as wood can shrink and expand. This is kept to a minimum with a constant relative humidity of around 50%. This prevents cracks in your wooden furniture. If you have already discovered cracks in your wooden furniture, maintain your furniture extra and wait for the period of freezing cold to end. Usually the cracks disappear by themselves when the humidity is back to normal.

## WOOD IS A HIGH-GRADE MATERIAL

Wood needs to be treated with care. Sharp, hot or wet objects may damage the wooden surface. Spilt liquids should be removed immediately to prevent stains. The use of caustic - and certainly abrasive - cleaning agents is not recommended. Many stains can be prevented by using coasters and by shorten the exposure time of the stain by removing it in time. With the correct maintenance of oiled and soaped furniture you can avoid that stains can penetrate the wood.

## SMALL DO-IT-YOURSELF REPAIRS

The advantage of unpainted and not artificially coloured solid furniture is to have the routine maintenance and small repairs in your own hands. Permanent and serious stains, such as traces of regular touching or rubber shoes on table legs, can be removed using fine (400-grit) sandpaper. Make sure you sand lengthwise in the direction of the wood grain. This will remove the film of oil or soap that had been put on for protection. Remember to re-apply the surface protection after treatment. A deep scratch or dent may be repaired through sanding or swelling (briefly pressing a hot iron onto a moist cloth on the damaged spot). In that way it will be a breeze to repair small damage to your furniture without expert knowledge.

## IN A NUTSHELL:

- Prevent discoloration by keeping your furniture away from permanent sunlight.
- Keep some distance between your furniture and the heat source (heater or heat pump), to prevent the wood from drying out.
- Get yourself a hygrometer and keep the relative air humidity indoors between 50% and 60%.
- Use coasters or placemats to prevent rings from cups and glasses.
- Be careful with porous vases and flower pots, these can leave irreparable circles behind.

## WHEN WINTER COMES

To prevent cracks in your furniture in winter due to a dry indoor climate, you can do the following:

- Place a humidifier.
- Maintain your furniture with soap (or oil) more often
- Ventilate your house sufficiently.

# MAINTENANCE WITH OIL

Use a moist cloth for everyday cleaning of the furniture.

Maintenance with oil is carried out every six months or annually, depending on use.

When using the white-pigmented maintenance oil, remember to shake the bottle (and possibly stir the fluid) to ensure the white pigment and the oil are mixed well.

Apply a small amount of maintenance oil to a cotton cloth and rub into the wood.

Allow drying for 20 minutes: rub the furniture dry with a clean cotton cloth in the direction of the wood grain. Repeat the treatment after approx. 40 minutes.

The furniture may only be used normally after 4 hours. After treatment with maintenance oil, the wood on the treated areas should not come into contact with water for 24 hours to allow the undisturbed curing process. Use coasters during this time.

**Warning:**

*after use, remember to rinse the cotton cloth that has been used to rub in the maintenance oil and let it dry in the open air. Alternatively, dip the cloth into water, put it into a plastic bag and throw it away. That is to avoid the risk of spontaneous combustion.*

Maintenance products such as soap and oil can be ordered at your dealer or via an email to [pilat@pilat.nl](mailto:pilat@pilat.nl).

- |                                 |        |         |
|---------------------------------|--------|---------|
| • bottle of natural oil         | 250 ml | € 10,-* |
| • bottle of white pigmented oil | 250 ml | € 10,-* |
| • bottle of brown oil           | 250 ml | € 10,-* |
| • bottle of black oil           | 250 ml | € 10,-* |

\* excluding shipping, prices may vary by country

The natural oils used for Pilat&Pilat furniture enhance the structure and the colour of the wood and create a strong and abrasion-proof surface. The special composition of the oil ensures the "breathing" ability of the wood. That is the reason why the wood is resilient and durable, while it retains its natural properties.

By using the furniture, the oil layer can become worn. In that case you may wish to bring the furniture 'back to life' using the maintenance oil supplied (natural or white-pigmented). The maintenance oil repairs the original film of oil and gives a silky, resilient and dirt and water resistant layer.

Content maintenance box:

- 250 ml maintenance oil (white pigmented, natural or brown)
- polishing cloth
- plastic bag
- sandpaper
- maintenance recommendation

## IMPORTANT:

**Pilat&Pilat-Furniture treated with oil will require an 8 to 10 - week curing period. In this time, the wood will be covered with a protective layer. We advise against the intensive use of the furniture in this period.**

**• Do NOT treat your furniture with maintenance oil for the first 8 - 10 weeks.**

**• Protect your oiled furniture against moisture by using coasters.**

# MAINTENANCE WITH SOAP

## Normal maintenance

Put 1 part soap in a jar or bottle and add 10 parts water to it. Apply the mixture to a clean, damp microfibre cloth and rub the furniture in the direction of the wood grain. Leave for 2 minutes and then wipe the furniture with a slightly damp cloth.

The maintenance with soap should be repeated, depending on the usage and to what extent the furniture is dirty:

- **dining and coffee tables:** once every 1 to 3 weeks (clean regularly along the legs of your furniture too, to avoid colour differences)
- **dressers and closets:** once every 1 to 3 months

Before using a mixture of white pigmented soap, stir or shake the mixture well to mix the white pigment with soap.

It is advisable to keep this mixture in a closable bottle or spray bottle, ready for use.

Apply the mixture with a cloth (dish cloth or microfibre cloth) and soap the whole piece of furniture in the direction of the woodgrain. Let it soak for about 2 minutes.

Then wipe the furniture with a clean, damp cloth removing excess soap and dirt. The water will evaporate very rapidly, leaving a new layer of soap in the wood.

It can occur, especially in oak, that the wood fibers open after the first maintenance with soap. The furniture then feels rough. In the maintenance box you will find a piece of sandpaper 400. Then sand, in the length of the wood grain, the surface soft again.

Maintenance products such as soap and oil can be ordered at your dealer or via an email to [pilat@pilat.nl](mailto:pilat@pilat.nl).

- bottle of natural soap 250 ml € 10,-\*
- bottle of white pigmented soap 250 ml € 10,-\*

## FOR PERSISTENT STAINS

- Super stain remover 250 ml € 18.95\*
- Stain spray (oak) 250 ml € 19.95\*

\* excluding shipping, prices may vary by country

Soap as a maintenance agent for wooden furniture works in two ways. Firstly, soap acts preventively. After each soap treatment, a saturation of the surface by the coconut and soy grease follows, disallowing dirt and moisture are to penetrate into the wood. Secondly, the soap also works as a cleaning agent by removing the dirt in the upper layer of the wood. When a soaped furniture is delivered to you, it is pre-treated with an extra protective layer and then soaped several times. It is recommended to maintain the furniture regularly with soap.

The soap (white pigmented or natural) is manufactured from raw plant materials without the use of colors, fragrances, preservatives or other artificial additives.

The soap is highly concentrated and has to be diluted with water prior to application to the wood (1 part soap to 10 parts water). The higher the concentration of soap, the whiter / paler the wood becomes or remains. As you apply the soap more often, the wood will become or remain more white or pale. The wood is therefore better protected.

## Maintenance for dirt and stains

Apply the diluted soap to the rough side of a scouring pad. Then sand the stain with light pressure in the direction of the wood grain. Then wipe the area with a clean, damp cloth. Repeat this for stubborn stains. The furniture should dry between treatments. Then soap the furniture according to normal instructions with a damp cloth.

Difficult stains, such as greasiness and red wine, can be removed by applying a small amount of diluted soap to the stain and covering it with a damp cloth and allowing the soap to work for about 10-12 hours. Then soap the surface again.

## Content maintenance box:

- bottle of 250ml maintenance soap (white or natural)
- scourer
- sandpaper
- maintenance instructions

# MAINTENANCE OF LACQUERED SURFACES

In addition to the treatment with oil and soap, Pilat&Pilat offers a lacquer finish. A transparent lacquer can be combined with a stain. Furthermore, oak can be sprayed in a color lacquer, whereby the structure of the wood remains visible. In addition to the standard color lacquers, a lacquer finish is possible in almost any RAL or Sikkens color.

A lacquer closes the wood in such a way that air humidity differences have less influence on the operation of the wood. Furthermore, lacquering is practical: the furniture can easily be removed with a duster or slightly damp cloth (not too wet). Do not use in the treatment of stains abrasives, only mild soapy water.

**Important: do not let liquids lie down but remove within 10 to 15 minutes. Use coasters and do not put any hot objects on the furniture, this will give stains that can not be removed.**

Be careful with porous vases and flower pots, these can leave irreparable circles. Under glass with cool drinks, condensation can form under the bottom. That is why it is good to use coasters.

A lacquered furniture feels different than a furniture with oil or soap finish. Due to the paint the contact with the wood disappears for the user. Any damage is more difficult to solve. Where in a soap or oil finish a piece of furniture can be updated without visible traces, a lacquered piece of furniture will often have to be completely sanded and re-sprayed.

## key features / additional prices

- see also: Mads bench
- Frame with coating in the standard colors RAL 9004 (black), RAL 9010 (white), Sikkens C4.40.30 (red), F6.05.50 (taupe) or E4.40.40 (caramel). Alternative colors are available on request
- in oak the tabletop consists of 4 or 5 parts with a total width of 90 or 100 cm and full lengths. Ask for the stock and customization options.
- by using wide parts of wood, the delivery time of this table can be longer than usual
- both pictures show a Mads table with an oak table top
- a light elm or walnut table top can be composed as seen on the second picture
- overhang at:
  - length 300 cm: 37 cm
  - length 350 cm: 47 cm
  - length 400 cm: 89.5 cm
  - length 450 cm: 97.5 cm
  - length 500 cm: 100 cm
- The finishing options are according to the solid wood samples such as presented in the current sample box.
- The prices are the same for all finishes; soap, oil, stain-lacquer, transparent lacquer and color lacquer.
- in oak the tabletop is possible in a rustic version; cracks in the tabletop and open knots are filled with black coloured filler. This option does not affect the price.

 example: low model 30 cm,  
 1320 wide (3 compartments)

complete

indication of the  
 (start) position of the body

## key features / additional prices

- a Berend cabinet can be composed using 2 different parts:
- 2 heights base frames:**  
 low: 300 mm or high: 500 mm
- 3 heights of body parts:**  
 1 = 230 mm high (equipped with flaps),  
 2 = 440 mm (equipped with doors)  
 3 = 865 mm high (equipped with doors)
- sizes and prices of the various width measurements made insightful on the next 5 pages
- finishing possibilities according to the solid wood samples as presented in a current sample box
- the prices are the same for all finishes; soap, oil, stain-lacquer, transparant lacquer and color lacquer.

## To order

- in addition to the chosen wood type and finish we require the following information for proper order processing:
  1. width of the Base (number of compartments)
  2. height of the Base (300/500mm)
  3. width of the body (number of compartments)
  4. height of the body (230/440/865mm)
  5. position where cabinet body should start
  6. by default, the wooden part of the base is not in the color of the steel frame. Entire base in one color? Then indicate this when ordering.
- 7. For body heights 440 and 865 indicate how the doors should open, left-handed or right-handed. Indicate with the following symbols:
